

# MARKETING AND DIGITAL STRATEGY - BS

## Program Description

Marketing is all about identifying consumer needs/wants and then translating this knowledge into insights that drive business decisions. Students majoring in marketing master the core concepts of marketing, emphasizing the elements of the marketing mix, target markets and consumer behavior, which are necessary to create effective marketing plans. Topics include product and service development, pricing strategies, supplier and distribution channels, promotional strategies, social media marketing and communication, and marketing research. Students will also explore how marketers assess the ethical implications of marketing decisions on consumers, organizations, and society as a whole. A degree in marketing provides graduates with the skills and knowledge for successful marketing careers in for-profit and non-profit organizations, both large and small. Students working toward a major in marketing are encouraged to develop hands-on experience in the business world by participating in one or more marketing internships. Opportunities for graduates include positions in sales and marketing, market research, advertising, public relations, digital and social media marketing, marketing analytics, as well as many other career paths.

The marketing major is available to students enrolled in the College for Women and the College for Adults.

This major is offered in the College for Women.
