

INFORMATION SYSTEMS - MINOR

The Information Systems Minor is intended for students in the math and science majors to help them gain experience with computer and information technology applications and be able to serve as a liaison between technologists and users/clients in information systems. It is designed to provide practical, hands-on skills with information technologies in order to complement many majors of theoretical focus in their studies. Students in this minor will have increased employability for a wider variety of careers in the technology related field.

The Information Management / Library and Information Science Department offers the Master of Library and Information Science graduate degree as well as the Information Systems minor and the Digital Humanities minor at the baccalaureate level.

Students minoring in Information Systems cannot concurrently earn a Digital Humanities Minor.

This minor is offered in the College for Women only.

Curriculum

Code	Title	Credits
ISCI 1000	Information, Technology and Digital Society	4
ISCI 4900	Capstone in Information Science and Technology	4
Select one from:		4
CSCI 1110	Algorithms and Computer Programming I ¹	
ISCI 1200	Web Design	
ISCI 1300	Intro to iPhone/iPad App Dev	
Choose eight credits from:		8
CSCI 1120	Algorithms and Computer Programming II	
One of the courses not selected above		
Other courses to be developed		
Total Credits		20
