A ST. CATHERINE EDUCATION

A St. Catherine Education . . .

- Gives You the Tools to Lead Change. We support students as they
 develop into what we call the St. Catherine leader someone who
 lives a commitment to justice, acts from a strong self-concept, thinks
 critically and creatively, communicates effectively, exercises power
 appropriately, cultivates a positive sense of direction, and evokes
 hope.
- Emphasizes the Liberal Arts. We offer a wide range of liberal arts
 majors. In addition, numerous other majors and minors are available
 to baccalaureate students in the day program through the Associated
 Colleges of the Twin Cities (ACTC), a consortium of five local private
 colleges. Full-year and semester study-abroad programs are available
 in various countries. Intensive core curriculum requirements in math,
 writing and information literacy support the baccalaureate major
 course of study.
- Helps You Get Ahead. You'll learn to think on your feet, solve problems creatively, adapt to changing conditions and master new technologies. We anticipate change through evolution of the curriculum - in healthcare, professional programs and the liberal arts.
- Provides Intensive Career-Development Training. You will be supported by academic and faculty advisors as well as other professionals who will help you plan your college courses, choose a major and define career goals. Intensive advising, personalassessment tests, and internship and mentorship opportunities will prepare you to pursue your career goals. You'll also learn how to write a résumé, conduct an interview, negotiate a salary or apply to graduate school.
- Helps You Discover Your Inner Voice. St. Catherine requires two
 core-curriculum courses for baccalaureate students that will help
 you define your values. The Reflective Woman (TRW) asks first-year
 students to examine who they are, who they want to be and how they
 will make life-changing decisions. Global Search for Justice (GSJ)
 asks juniors and seniors to turn those values outward. By studying
 global issues of peace, meaningful work and social justice, you'll
 begin to develop the discipline and consciousness needed to change
 systemic conditions and reshape your world.
