POLITICAL SCIENCE (POSC)

POSC 1710W Introduction to American Government and Policy — 4 credits
This class starts by examining big questions in political science. What is justice? Where does the authority to govern come from? In the first half of this class, we will discuss various answers to these questions and how they relate to different political ideologies. While some of the readings we will do in this class were written hundreds of years ago, they still reverberate through today's debates on many political issues. Students explore this connection in short writing assignments that examine current policy debates and political philosophy. The second half of this course begins with students learning how to write a policy memo, an important writing style that is commonly used when working in politics, advocacy, or the nonprofit world. Students will write a policy memo on a topic of their choice. We discuss the institutions of U.S. government and explore their strengths and weaknesses. This includes exploring the branches of government, political parties, social movements, the roles of voters and constituents, and who decides to run for office. Offered in the College for Women.

POSC 2200W Introduction to Comparative Politics — 4 credits
This course offers an examination of basic concepts of comparative politics such as political power, types of political systems and political development. It involves analysis of similarities and differences in the components of political systems: political culture, civil society, participation, leadership, interest groups, political parties, legislatures, executives, judiciaries, and bureaucracy. Case studies of several major political systems, which may include Great Britain, France, Russia, Japan, China, India and Kenya, will be included. Offered in the College for Women.

POSC 2250 Introduction to World Politics — 4 credits
This course is an introduction to the fundamental concepts and salient issues of international politics: bases and instruments of national power; diplomacy, weapons and war; Cold War and post-Cold War rivalries; European integration; the balance of power, the U.N., the North-South conflict; and the politics of global economic relations and environmental security. Offered in the College for Women.

POSC 2600 Politics of Global Cities — 4 credits
Cities are increasingly gaining power in global politics, and global cities are leading the charge. As politically-organized entities, cities are defining agendas at both the national and international levels, challenging the notion that cities are animals of the state. This course will dive into these tensions, and ask the following: What makes a city "global"? Why are the Twin Cities, Rio de Janeiro, and Berlin in a different category from New York, Paris, and Tokyo? What makes them unique? What issues do they face and address? In bypassing it, are cities really replacing the state? How are non-global cities addressing international questions? What about local issues? Students will compare the particularities of various cities and extrapolate generalizable attributes. Students will unearth the tensions that various cities face, and then as a class will apply their gaze to the Twin Cities and determine to what extent our own metropolis is amenable to being a global city – its attributes, limitations, tensions, and projections. Offered in the College for Women.

POSC 2994 Topics — 4 credits
The subject matter of the course is announced in the annual schedule of classes. Content varies from year to year but does not duplicate existing courses.

POSC 3000 From Nudges to Nuclear War: Game Theory and Behavioral Economics — 4 credits
In public policy, we frequently encounter situations of conflict and cooperation. Game theory offers tools to model these situations, including showing why groups of rational people can make bad choices. Game theory famously came into prominence during the cold war, where it offered insights to avoid global nuclear war. Today, game theory is used in debates on many political issues, including showing why groups of rational people can make bad choices. Game theory famously came into prominence during the cold war, where it offered insights to avoid global nuclear war. Today, game theory is used in debates on many political issues, including showing why groups of rational people can make bad choices. The insights from behavioral economics help design smarter policy, including "nudges" and how choices are framed. In this class, we will learn how to use game theory & behavioral economics to analyze important questions in policy, political science, & economics. Offered in the College for Women. Also offered as ECON.

POSC 3010 Candidate Katie: From Community Engagement to Campaigns and Elections — 4 credits
In this course, students will learn how to channel their passions and values into running for public office – to lead and influence in the formal political sector. Emphasizing the old adage “it’s not [only] what you know, but who you know,” the course will emphasize the creation of professional networks and drawing on those ties to build coalitions and webs of support to lead successful campaigns. This course entails both an experiential learning and a career-readiness component, grounding the call the serve in real community challenges. Offered in the College for Women.

POSC 3070 Public Policy — 4 credits
This course deepens students’ understanding of the theory and tools of public policy analysis. Fundamentally, we ask "Why do we need government?" If people acting in their own self-interest promote the common good, we shouldn't need government involvement. This course explores when and why markets fail to provide the optimal outcome – requiring outside intervention. We examine how to use data to describe policy problems and evaluate potential solutions. We end the course by discussing how to design a policy and how to value its impact. Throughout the semester, students engage in research on a policy problem that is relevant to a community partner organization. Students will develop a model showing the policy problem, analyze data to quantify the problem and/or possible solutions, evaluate the costs and benefits of potential solutions, and analyze how to craft an effective policy solve the problem. Based on their original analysis, students create a written document and a presentation for the community partner organization. Also offered as ECON.

Prerequisite: ECON 1120 or ECON 2610. Offered in the College for Women.
POSC 3150 Women and Globalization — 4 credits
This course aims to provide students with an understanding of how processes of globalization are gendered, and the politics of gender in a globalizing world. We will explore how contemporary globalization shapes national belonging, citizenship, consumption, labor, violence, and survival. Students will contrast dominant conceptions of globalization (and their critiques) with cases of globalization in practice, with particular emphasis on existing inequalities despite increased opportunities. We will explore structures of global governance and neoliberal policies, the roles of institutional agents, and responses of local actors, all through the lens of gender to understand how women are affected by global economic and political processes. The class will look critically at the changing conditions for women in the contemporary context, and will explore political responses – such as gender mainstreaming - to persistent challenges. We will investigate the relationship between women's movement(s) and other social movements, and examine the tensions between global issues and local responses. The course concludes with thoughts on the evolving strategies of social movements, and the importance of recognizing women's diversity and intersectionality in the face of globalized injustices. Also offered as WOST 3150. Offered in the College for Women.

POSC 3170 Discrimination and Disparities: The Economics and Politics of Race and Gender — 4 credits
In this course, we will investigate an important set of questions in public policy. Why do average earnings vary dramatically by race and sex in the United States? What policies worsen or alleviate these disparities? The course balances theory with real world public policy examples. The course also develops students' Excel skills to prepare them to conduct basic data work in government, advocacy, business, and industry settings. Offered in the College for Women. Also offered as CRST 3170. Offered in the College for Women.

Prerequisite: Any 1000- or 2000-level ECON or POSC course.

POSC 3350 Nationalism and Ethnic Conflict — 4 credits
Students will study theories of nationalism and the aspirations of nationalist actors in both domestic and international contexts. Particular attention is given to problems of citizenship and state formation; ethnicity and nationalism; democratic institutional design and political representation; and ethnic conflict. Case studies are drawn from the industrial democracies and the developing world. Also offered as CRST 3350. Offered in the College for Women.

POSC 3450W Haves and Have Nots: Development, Poverty, and Inequality — 4 credits
This course explores the role of poverty and inequality in the process of economic development and growth. Students will examine the impact of social, political, and economic factors on poverty and how these factors relate to economic growth in developing countries. Topics include international financing of economic development, human and natural resources and their role in the development of economies, monetary policy and international aid. The emphasis of this course is on the role of women in national development and how this can impact the overall economy and economic stability of a developing country. Offered in the College for Women and the College for Adults.

Prerequisite: ECON 1120 or ECON 2610 or ECON 2620. Also offered as CRST 3451W, ECON 3450W, and WOST 3452W.

POSC 3700 History of Feminism in Western Society — 4 credits
This course traces the development of feminist thought and activism in Western society from the ancient Greeks to the late 20th century in the United States. The course explores the social, political, legal and cultural status of women in Western society across time. Special emphasis is placed on the roots of modern feminism as it developed in the 18th, 19th and 20th centuries in Western Europe and in the United States. Also offered as HIST 3700 and WOST 3700. Not open to first-year students.

POSC 4602 Internship — 2 credits
This is a structured out-of-class learning experience that takes place on or off campus and includes a substantial work component. An internship involves students in a particular profession in an exploratory way to test career interests and potential. To initiate an internship experience, meet with the internship coordinator in the Career Development Office.

Prerequisites: Faculty sponsorship and approval by department chair.

POSC 4604 Internship — 4 credits
This is a structured out-of-class learning experience that takes place on or off campus and includes a substantial work component. An internship involves students in a particular profession in an exploratory way to test career interests and potential. To initiate an internship experience, meet with the internship coordinator in the Career Development Office.

Prerequisites: Faculty sponsorship and approval by department chair.

POSC 4684 Directed Study — 4 credits
Directed study is provided for students whose unusual circumstances prohibit taking a regularly scheduled course but who need the material of that course to satisfy a requirement. Availability of this faculty-directed learning experience depends on faculty time and may be limited in any given term and restricted to certain courses.

Prerequisites: Faculty, department chair and dean approval.

POSC 4850 Theory to Action — 4 credits
In this course, we will examine how to navigate the many options available to economics, financial economics, international business economics, and public policy students after graduation. We will explore how to synthesize your years at St. Kate's and communicate your skills to employers. Topics covered include graduate school, career paths, professional communication skills, and how to craft a happy and fulfilling life. The course emphasizes experiential learning, guest lectures, and field trips. Offered in the College for Women and the College for Adults. Also offered as ECON and NPSO.

POSC 4951 Independent Study — 1 credit
POSC 4952 Independent Study — 2 credits
POSC 4953 Independent Study — 3 credits
Advanced students research a topic of interest to them under supervision of a faculty member. Students also may take seminars offered in Washington, D.C., by the Washington Center.

Prerequisites: Instructor and department chair approval.

POSC 4954 Independent Study — 4 credits
Advanced students research a topic of interest to them under supervision of a faculty member. Students also may take seminars offered in Washington, D.C., by the Washington Center.

Prerequisites: Instructor and department chair approval.

POSC 4994 Topics — 4 credits
The subject matter of the course is announced in the annual schedule of classes. Content varies from year to year.
