

BUSINESS ANALYTICS - MINOR

Business analytics are applied in many areas within business including management, marketing, accounting, finance, sales, operations, and strategic planning. It is now critical for managers to be able to make sense of the increasing availability of extremely large amounts of information called "Big Data." The Business Analytics minor is designed to provide students the ability to utilize quantitative decision-making tools and techniques commonly used in various business occupations. Upon completion of the minor, students will be able to analyze, evaluate, and interpret data to justify making sound business decisions.
