

EARLY CHILDHOOD EDUCATION ASSOCIATE OF APPLIED SCIENCE

Coursework is grounded in Montessori philosophy & practices, Anti-Bias-Anti-Racist Pedagogy and whole-child centered learning. By completing coursework through St. Kate's, adult learners gain university credits within an Associate's degree program. These credits could later be transferred into a Bachelor's program, giving the student options for professional growth and all the implications that come with more advanced degrees including pay raises and more elevated positions.

In this Associate Degree program, you can expect to: gain critical knowledge to help you be a more effective classroom teacher; engage in critical self-reflective activities to engage in personal transformation to become ethical and influential educational leaders; and be informed by the philosophy of Maria Montessori and her vision of peace and social justice to develop a greater understanding of themselves, children, and the world. You will gain real-world experience to prepare you to develop your teaching pedagogy with an individualized, anti-bias and anti-racist teaching approach influenced by Montessori philosophy that honors the whole child. In order to do this, you will also learn how to navigate the demands of teaching and learning. In order to be an effective teacher, the mind, body, and spirit must be supported. Strategies for sustaining yourself in the field are integrated into all courses through a holistic approach to the field of education. This includes a commitment to serving in, learning from, and collaborating with diverse communities that share a common vision of educational equity.

Through this program, you will deepen your understanding of key developmentally appropriate practices of the preparation of the adult and observation skills with an Anti-Bias, Anti-Racist lens. Your courses are taught by instructors who are experts in the field of Early Childhood Education.

In addition to the program-required courses, students must complete the LIFE general education core curriculum (<https://catalog.stkate.edu/undergraduate/core-curriculum/liberal-arts-science-core-curriculum-associate-programs/>).

The A.A.S. Early Childhood Education program requires a minimum of 61 credits.

Code	Title	Credits
ECED 1000	Introduction to Early Childhood Education	4
ECED 2040W	Historical, Cultural and Social Foundations of Early Childhood Education	4
